

Ports and Marinas insurance

Title: Ports and Marinas insurance

Educational Objective: The objective of the lecture is to present the various liabilities of a Port or a Marina manager and/or owner, the various insurable items and the solutions offered by the French and London markets.

Target skills: Understanding the damage and liability risks of commercial ports and marinas and being able to offer solutions to the clients in respect of floating units and onshore risks (piers and pontoons, buildings), as as to understand the solutions available on the London and international insurance markets.

Target audience: This lecture is intended for underwriters, account handlers and claims handlers who would like to extend their knowledge of marine and non-marine transport market challenges in the P and C market in France so as to be able to offer alternative solutions to their clients.

Prerequisite skills: Global knowledge and understanding of marine and non-marine transport insurance contracts.

Technical teaching resources: The lecture will consist of PowerPoint presentations with live commentary and analyses of market figures. Risk analysis based on concrete examples. Analysis of standard policy wordings and market slips policy

Final Evaluation: The trainees will be asked to write a short report following their completion of the evaluation document. A list of signatures of the trainees and a certificate of attendance will be issued together with a short report from the convenor summarising the day.

Evaluation Document : Multiple-choice questions (MCQ)

Duration : ½ day / 5 hours
